@URAL FEDERAL UNIVERSITY

WRITTEN BY

MUSA MANNEH, SAMA JAWNEH AND BABOUCARR SAMBA

We have successfully graduated with a Management masters specialization on Global Energy Business with an excellent or A grade (Red Diploma) from Ural Federal University, Graduate School of Economic and Management, Department of Management Systems in Power Engineering and Industry.

Ural Federal University is located in the famous Ural industrial zone, where several Russian corporations who are leading role in the world heavy industry and Energetics industry are situated. MSc in Global Energy Business is a multidisciplinary unique master's degree programs that provide us with a detailed understanding of transformative in energy systems and industry.

The course structure is a detailed blend of both theoretical and practical aspect of industrial management, marketing, finance plus energy business industry dynamics as well as technology for different energy sources and there decision making options. The head of the department, course coordinator, professors and lecturers as well as administrative staff are all very supportive in during the course period. Currently, our country The Gambia is facing thematic energy challenges, so we believe that this master's degree will help us to take a leading role in combating and providing solutions to these energy challenges of The Gambia as well as the beginning of partnership between Russia and The Gambia. In a nutshell, this major gives us professional management skills development needed in understanding world economic models and global energy trends. We are confident that by choosing Global Energy Business program, we did the right thing. It will lead us to success!
